

DOWNLOADING ANTLR

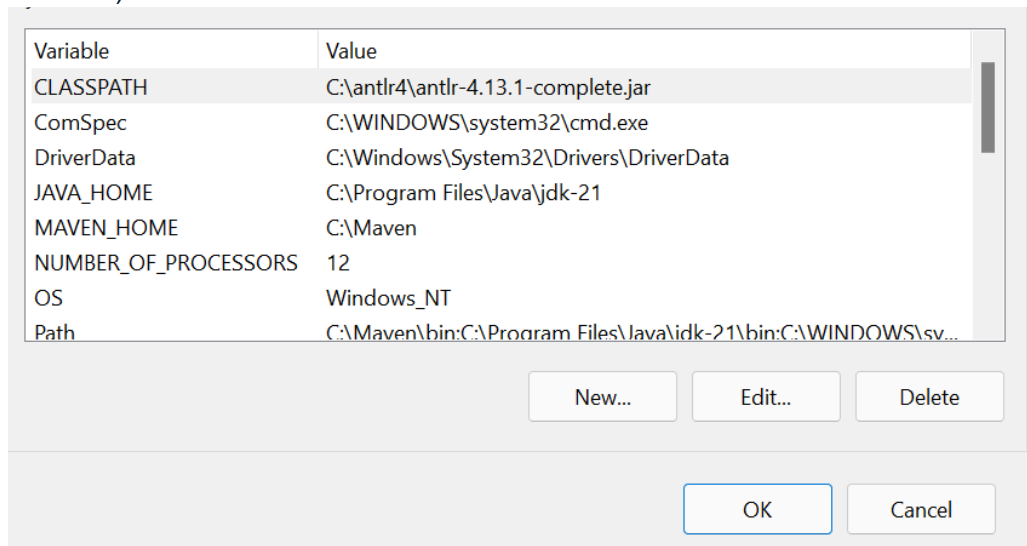

You can download the ANTLR 4.13.1 complete JAR file directly from here:

<https://www.antlr.org/download/antlr-4.13.1-complete.jar>

Add ANTLR to your system variables by going to:

Settings -> System -> About -> Advanced System Settings -> Environment Variables-> Go to System Variables -> New -> CLASSPATH: and add your path of jar file (for eg: C:\antlr4\antlr-4.13.1-complete.jar).

Also add it in Path->New under system variables as well but without the jar file (for eg: C:\antlr4).

To run in python:

Go to VS code. Run the following commands in cmd/powershell

- pip install antlr4-python3-runtime
- java -jar "C:\path\to\antlr-4.13.1-complete.jar" -Dlanguage=Python3 arithmetic.g4
(OR)
antlr4 -Dlanguage=Python3 arithmetic.g4
- python arithmetic.py
